

# Registration Information Carbon Footprint of Products (CFP)

| 1. Product information |                                |   |  |
|------------------------|--------------------------------|---|--|
| 1.1                    | Registration number            | CR-DG02-17042-A   | 1.7 Product photo<br><br> |
| 1.2                    | Registration name              | Xerox AltaLink C8055  |  |
| 1.3                    | Model name / number            | Xerox AltaLink C8055  |  |
| 1.4                    | Main specifications of product | Print speed (Color/Mono): 55ppm/55ppm<br>Maximum Paper size: SRA3(320x450mm)<br>Capable of print/copy/scan/fax, duplex printing.<br>Product Size: 640(W)x732.8(D)x1142.7(H) (mm)<br>Product weight: 144kg |  |
| 1.5                    | CFP quantification unit        | Per unit product  |  |
| 1.6                    | CFP release date               | May 8th, 2017   |  |

| 2. Company Information |                                |                                    |
|------------------------|--------------------------------|------------------------------------|
| 2.1                    | Company name (in English)      | FUJIFILM Business Innovation Corp. |
| 2.2                    | Phone number (incl. area code) | +81-3-6271-5111                    |

| 3. CFP quantification results, and description of CFP declaration |  |   |                      |
|---|--|---|----------------------|
| 3.1   | CFP quantification results                                 | 3,600   | kg-CO <sub>2</sub> e |
| 3.2   | Breakdown (by life cycle stage, by process, by flow, etc.) |   |                      |
|   | Raw material acquisition stage                             | 840   | kg-CO <sub>2</sub> e |
|   | Production stage   | 20  | kg-CO <sub>2</sub> e |
|   | Distribution stage   | 160   | kg-CO <sub>2</sub> e |
|   | Use & maintenance stage                                    | 2,500   | kg-CO <sub>2</sub> e |
|   | Disposal & recycling stage                                 | 66  | kg-CO <sub>2</sub> e |
| Value in CFP mark and description of additional info.             |  |   |                      |
| 3.3   | Value in CFP mark  | <Numerical value>   | <Unit for the value> |
|   |  | <b>3,600kg</b>  | per unit product     |
| 3.3   | Description of additional info.                            | <p>*Calculated by the standard Scenario for MFP (EP type).<br/>                     *CO<sub>2</sub> emission in the distribution stage assumes the United States as the main sales area.<br/>                     *Electric power in the use and maintenance stage is evaluated with the public electric-power-consumption-rate in the United States.<br/>                     *Print volume is assumed 1,815,000 sheets.<br/>                     *In this scenario, the CO<sub>2</sub> emissions from copy papers are estimated 14,000 kg-CO<sub>2</sub>e at 4.0g per A4 paper.<br/>                     *The CO<sub>2</sub> emission of printing paper is excluded from the use and maintenance stage.</p> <div style="text-align: center;">  <p>Disposal &amp; recycling stage 2%</p> <p>Raw material acquisition stage 23%</p> <p>Production stage 1%</p> <p>Use &amp; maintenance stage 70%</p> <p>Distribution stage 4%</p> </div> |                      |
| 3.4   | Remarks  |   |                      |

| 4. Interpretation of CFP quantification results |  |  |
|---|--|--|
| 4.1   | Interpretation of CFP quantification results | <p>CO<sub>2</sub> emission in use and maintenance stage is the largest as 70%. It is important to save energy during product usage.</p> <p>The use condition in this scenario can be different from the use condition of the user.</p> <p>A choice of the use condition (print mode, print conditions and so on) can reduce the CO<sub>2</sub> emission during product usage.</p> <p>For example, 620kg-CO<sub>2</sub>e of the CO<sub>2</sub> emissions (approximately 17%) can be reduced if 2-in-1 print is applied to 50% of the estimated total print volume.</p> <p>Primary data is used in the raw material consumption. Secondary data is used in the parts manufacturing process which might not be reflected our own circumstances because it is difficult to collect the data for thousands of the parts. Please understand this result as the rough estimate according to the reason mentioned above.</p> |

| 5. Conditions of quantification |                                    |   |     |                     |          |
|---------------------------------|------------------------------------|---|-----|---------------------|----------|
| 5.1                             | Name of approved CFP-PCR           | Imaging input and/or output equipment   | 5.2 | Approved CFP-PCR ID | PA-DG-02 |
| 5.3                             | Assumptions of secondary data used | Basic secondary data v.1.01 is preferentially used. Available secondary data (country v.1.04, foreign country v.1.01) is used if the items don't correspond to basic data v.1.01. |     |                     |          |

| 6. Verification information |                     |                    |     |                                 |                  |
|-----------------------------|---------------------|--------------------|-----|---------------------------------|------------------|
| 6.1                         | Verification method | Product-by-product | 6.2 | CFP system certification No.    | —                |
| 6.3                         | Verification ID     | CV-DG02-17042      | 6.4 | Completion date of verification | April 28th, 2017 |

| 7. Program information |                  |  |     |          |   |
|------------------------|------------------|--|-----|----------|---|
| 7.1                    | Program name     | Carbon Footprint Communication Program                         | 7.2 | Web site | <a href="http://www.cfp-japan.jp/">http://www.cfp-japan.jp/</a> |
| 7.3                    | Program operator | Japan Environmental Management Association for Industry (JEMA) | 7.4 | Address  | 2-1, Kajicho 2-chome, Chiyoda-ku, Tokyo 101-0044                |

|   |         |  |
|---|---------|--|
| 8 | Remarks | Revised on April 1st, 2021: Implemented the company name change. |
|---|---------|--|

For secondary data, please refer to the information on the following CFP website.
