Requirements for the
available secondary data

Revised on May 10, 2012

Document ID: C-02-01

Japan Environmental Management Association for Industry

Requirements for the available secondary data

(1) More than 35 points shall be scored in the Table 1.

(2) All requirements shall be met.

Table 1. Data origin

No	Item	Option	Score
1	Data source	Process-based method (physical unit base)	18
		Statistics (physical unit base)	15
		Input-output table (monetary unit base including hybrid method)	10
		Unknown	0
2	Documentation of data handling	Academic paper with peer review	20
		Public report without peer review and mass balance is checkable.	15
		Public report without peer review and mass balance is not checkable.	10
		Un-public report with peer review	
		Other/unknown	0
3	Data producer	Public organization (i.e. national research body) / industry association	20
		Organization having enough specialties on the field of the data	15
		Other	10
		Unknown	0

Table 2. Confirmation of reasonability

No	Item	Content
1	Reasonability of data source	Data source, producer, geographical coverage and publish method are clear.
2	Reasonability of calculation	Mass balance is kept if mass balance data is available.
		In case of agricultural product, N ₂ O and CH ₄ are evaluated appropriately.
		Insufficient contents, miscalculation and the like do not exist.
3	Reasonability of result	There is no large difference (about 2 or 3 times) with similar basic secondary GHG data. If there is a large difference, a reason shall be appropriate.
